Chemical Datasheets

Non-conformances can easily be raised on lack of or incomplete chemical datasheets, it's important to make sure they are up to date with what you are currently using on farm. The usual hiccup is when there isn't a chemical datasheet for the boot dipping disinfectant used. Make sure when you buy a new chemical or disinfectant that you ask your supplier for a copy of the chemical datasheet and keep them all together in a single folder ready for use by staff/family members or your Red Tractor farm assessor.

Milk & Oil Prices

We last wrote about this back in March 2020 when fuel prices had hit a low point of \$20 with a milk price around 26 ppl. Since then, fuel prices have been on a steady rise with milk price following a similar trend. Over this period the ratio between milk price and fuel has been 1:1.77, i.e., the fuel price has been 1.77 times the milk price. With fuel prices now at \$76.63 we should be seeing milk prices of 42 ppl for the ratio to remain the same. At present we are between 7 and 10 ppl below this.

Thank you for your custom and support over the past year.

Wishing you a Happy Christmas and a Prosperous New Year from all at 

Ever Increasing Costs.... What are the implications on your Insurance?

Guest article written by Daisy Jackson of PIB Insurance Brokers.

Recent years have proved that it is increasingly difficult for businesses to predict potential challenges and to ensure their best interests are well protected, even before the onset of the current pandemic, the UK general insurance market was experiencing rate increases not seen in almost two decades.

Increased electricity, steel, building materials, fertiliser and feed costs brought about by both the Pandemic and Brexit during the past 12 months have further exacerbated the situation making it now more important than ever to review your sums insured to ensure they are adequate to reflect the reinstatement cost in the event of any loss.
