Fill Your Boots Now!

What a difference a month makes! The weather patterns of the last two springs have been the opposite of each other. What we lost in grass growth in April this year we regained in May. Certainly, in the south of the country the rapid recovery in grass growth in May has filled silage pits, leaving a lot less room for planned second cuts and whole crop. [Read more](#)

Wholecrop Harvesting

Do you have everything you need to harvest your wholecrop?

As I write this it's early July, though you'd never think so based on the current weather, which means it must almost be time to harvest any wholecrop you've got planted.

There is a relatively small window to get the best results possible for your wholecrop harvest so watch it closely! It can change from too soon to too late in literally a matter of a couple of days, depending on the weather, and can have a massive impact on the winter ahead. [Read more](#)

To Fertilise or not to Fertiliser?

With the rising prices of nitrogen, phosphate and potash fertilisers the inevitable questions are being asked as to whether phosphate and potash fertiliser should be purchased for the rest of this year and in to next year? Taking a "fertiliser holiday" can appear like an easy saving on costs, particularly when prices are rising, but is it? [Read more](#)

Free Water!

No Utility Bills and Running Costs - For life!

We are very pleased to announce that we have agreed a fantastic partnership with Water Powered Technologies who have developed the Papa Pump.

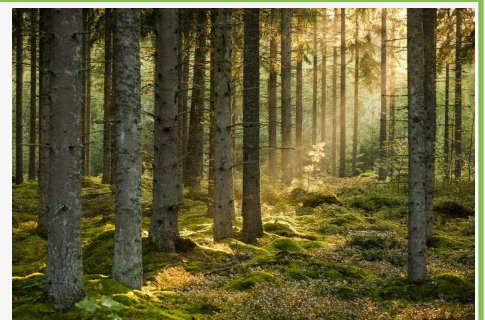

If you have access to water from a spring, stream or river and it needs to be delivered to your property, the Papa Pump agricultural pump is the perfect solution. [Read more](#)

England Woodland Creation Offer (EWCO)

There has been increased interest from clients looking at woodland grants over the last year, whether that be for their own enjoyment, to meet buyers demands or to boost biodiversity and wildlife on their land. The Woodland Creation Grant was always discussed but regularly deemed unachievable, with a minimum area of 5 ha (12.355 acres) for application required.

On the 9th June 2021, the RPA released the new England Woodland Creation Offer (EWCO), a grant available for creating new woodland on areas as small as 1 ha (2.471 acres). [Read more](#)
