What Cake should I be Feeding this Spring?

With cows now beginning to start grazing this spring what cake should you be using? It's a call I often have from members, and it's questions like this I am here to help with.

The problem with grass is it can have a greater variability than ensiled forages because it can depend on the weather, the time of year, timing of fertiliser application etc. etc. [Read more](#)

7 Top Tips for Communicating with Staff

Do you find your staff often misunderstand you and are they ignoring your instructions? Or are you finding your staff are complaining that they don't know what's happening around the farm? Poor communication is often quoted as the biggest frustration amongst staff on farms.

In this article on staff development, Paul Harris from Real Success Ltd, outlines 7 top tips on how to communicate more effectively with your staff.

Milk Prices - The Future is White the Future is Bright!

Is 40ppl Milk price the New 30ppl?

Who would have thought twelve months ago in the midst of a pandemic that we now would have had two interest rate increases, 7% inflation, fertiliser prices increasing 250% and feed prices 40%, Oil prices 100% and Electricity 250%. Agri Output prices such as milk, beef cereals etc. continue to rise, with Arla announcing a March standard litre price of 39.5ppl.

Think, be Prepared and Ready!

With so much volatility in the market currently, and prices so high, I know it might sound hard or boring to think about this, but now it is more important than ever to think ahead about what you need and when.

I say this because it is getting harder and harder to get hold of some products currently, and talk is it could get harder still. [Read more](#)

Are you Sensitive?

£:€, £:\$, €:\$, conflict, import/export tariffs, Brexit, World Trade Organisation agreements, red tape, unknown unknowns, all of these will impact on your business altering the price you receive for goods you sell and inputs you purchase.

We are all fully aware on the significant swings in fertiliser, fuel, feed and electricity prices seen since the turn of the year. You may feel that it is impossible to plan ahead with all the uncertainty, but you must. Producing five year plans is more important than ever to look at the impact on your business of these price shifts. [Read more](#)
